

COMPTEK Products

COMPTEK develops and delivers Precolours, Colour-Batches and Special Compounds compliant to end user specific requirements based on thermoplastic processable fluoropolymer and high performance amorphous and semi crystalline high-temperature polymers.

Thermoplastic processable PVDF, ETFE, FEP, MFA and PFA fluoropolymers are used as vehicle for many products where long time high chemical resistance and good dielectrical properties are important. The second COMPTEK product range is based on amorphous and semi crystalline HT-Polymers with excellent mechanical properties like PSU, PES, PEI, PPS, PPSU, PEEK and LCP.

COMPTEK Product range covers:

Polymer Vehicles	Colouring		Technical Compounds			
	solid Precolours Colourbatch	transparent colours and Batches	Glass Fibre Glass Beads	Graphite Carbon Fibre	Antistatic Semicond	Customer Special toll Recycling
PA MC	yes	yes	yes	yes	--	yes
PVDF	yes	--	yes	yes	yes	yes
ETFE	yes	--	yes	yes	yes	yes
FEP	yes	--	yes	yes	R&D	yes
PFA	yes	--	yes	yes	R&D	yes
PSU	yes	yes	yes	yes	yes	yes
PES	yes	yes	yes	yes	yes	yes
PPSU	yes	yes	yes	yes	yes	yes
PPS	yes	--	yes	yes	yes	yes
PEI	yes	yes	yes	yes	--	yes
PEEK	yes	--	yes	yes	yes	yes
LCP	yes	--	yes / --	yes	yes / --	yes

Maybe, the types needed for your new HT-polymers application are already listed below? If not, then we would be glad to meet you to discuss, customize and produce your customized Special Compounds, Precolours and Colour-Batches.

Please feel free to contact us for further information about featured polymer-vehicles, specific product data and our range of compounds, precolours and colour-batches:
